Al NAFI TRACKS – DRIP SCHEDULE

This document is designed to provide our students with a clear and concise overview of our Advancement Tracks schedule and the courses included within each track. We have implemented a drip schedule for these tracks, which means that certain courses will become available to students at specific intervals after making their monthly payments. This schedule is designed to ensure that students have the time to absorb and practice the material covered in each course before moving on to the next one. It is important to note that the schedule is subject to change at any time at the discretion of AL NAFI.

It is important to note that the course access timeline and its contents are subject to change at any time at the discretion of Al Nafi.

Additionally, annual users have the opportunity to apply for an internship immediately, while other users can apply for an internship once they have completed three months of access or more. As a reminder, students can no longer apply for the resume development service. Instead, students are encouraged to build their skills and experience through internships and create resumes. This policy will be in effect starting January 30th, 2022.

However, students who have registered and purchased our tracks before January 30th, 2022 may still apply for the resume development service provided by our Resume Development Office. All Cloud (AWS) custom Labs that are part of any of our Advancement Tracks will be accessible after the 10th monthly payment is received.

Disclaimer: AL NAFI reserves the right to modify, change, or update the drip schedules of our tracks at any time without prior notice, at our sole discretion. These changes may be made to improve the quality of our offerings, to better serve our students, or due to any unforeseen circumstances. As a result, students should regularly check our platform and their email for any updates related to the drip schedule of their track. By enrolling in any of our tracks, students agree to these terms and acknowledge that any modifications to the drip schedule are the sole responsibility of AL NAFI.
